

### Instructions to open project:

1. Got to GAME3002\_A1 folder > Assets folder > Scenes folder
  2. Click on any of the scenes (preferably, click on MainMenu scene for the full game experience)
  3. Once you go to the Main Menu Scene, click Play on top.
  4. You can click on buttons such as: "Play", "Instructions", or "Quit Game"
    - a. If you are playing in the editor, Quit Game button, doesn't do anything.
    - b. If you are playing in the build game, Quit Game button will quit the build and you can return to the editor.
  5. Please go to the instructions button (or click ESC key in the game) to know how to play the game.
- 

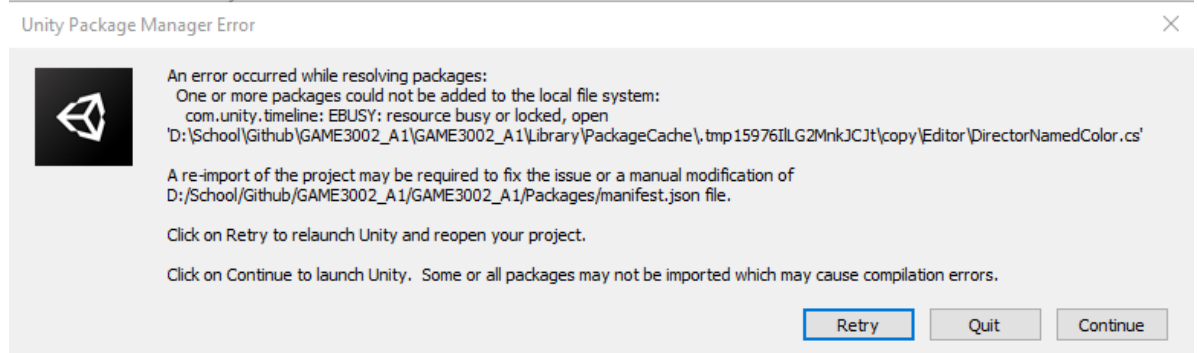

### WARNING:

- If you get a window like:

1. Click on 'Quit'
  2. Reclick/reattempt to click on one of the scenes
  3. Wait for the project to load again
- If you get a window like:

- a. Click on 'Retry' a couple of times. You can click on 'Continue' if you want. However, from personal experience, clicking on 'Retry' twice always got it to work.
